**Collaborators:**

None

**Contents**

Part 1.

Submission

Part 2.

Submission:

Part 3.

**Due Date:**

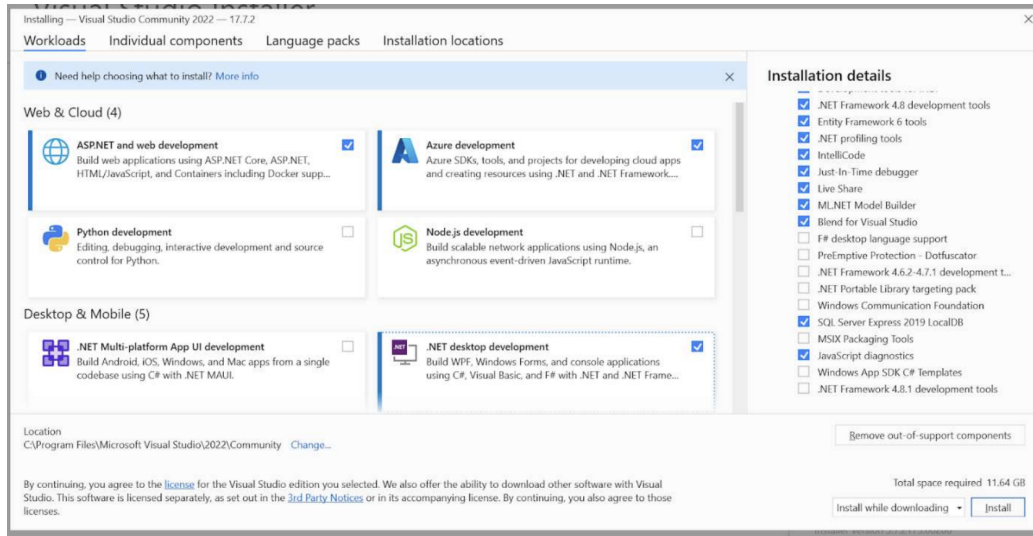

Tuesday, January 30, 2024 in lecture via hardcopy.

## Part 1.

**Setup and install Visual Studio 202x as well as SQL Server 202x.**

Install the Community Edition of Visual Studio, available for free from [microsoft](https://www.microsoft.com)

I recommend just accepting the defaults.

## Submission

Completed ☒

## Part 2.

**The purpose of this part is to ensure that you are able to compile and run Console and Winform C# Applications. Create two simple Hello World Applications.**

### a. One as a Console Application

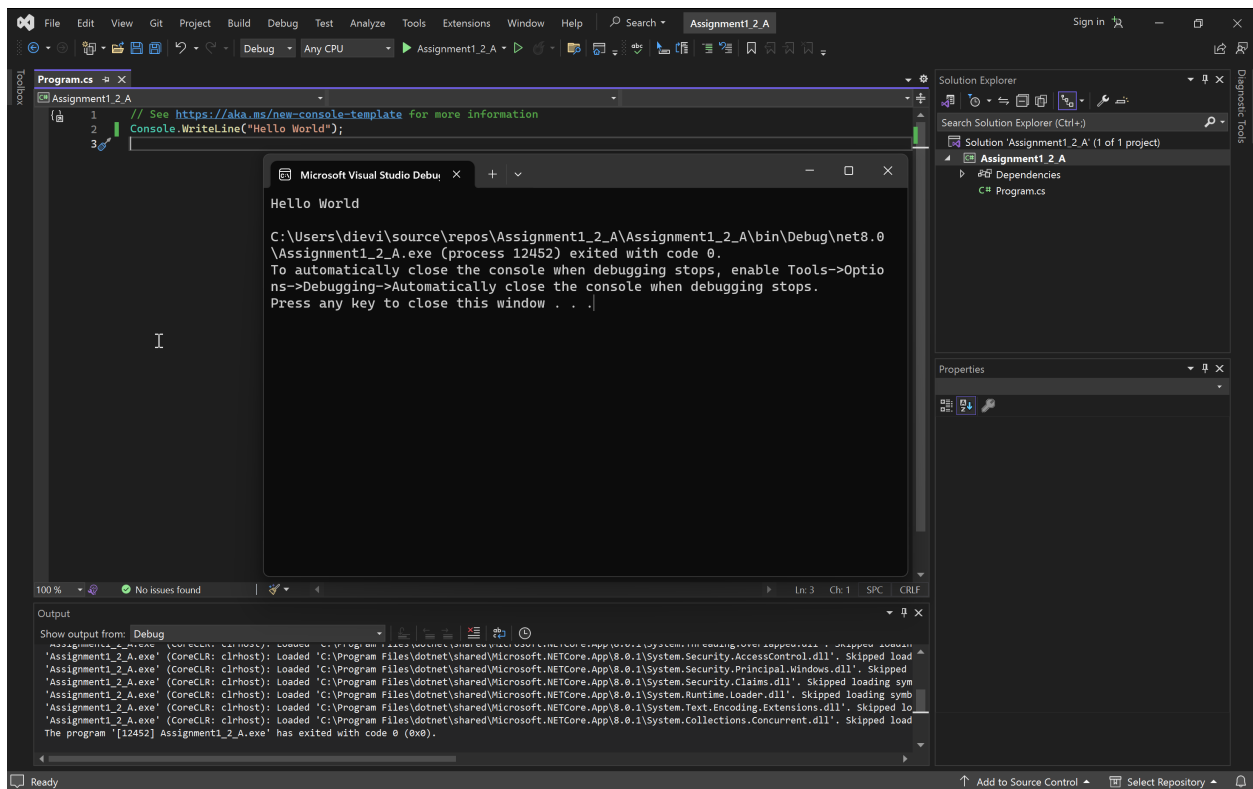

The Console application should simply generate the text “Hello World.” when run.

### b. One as a Winforms Application.

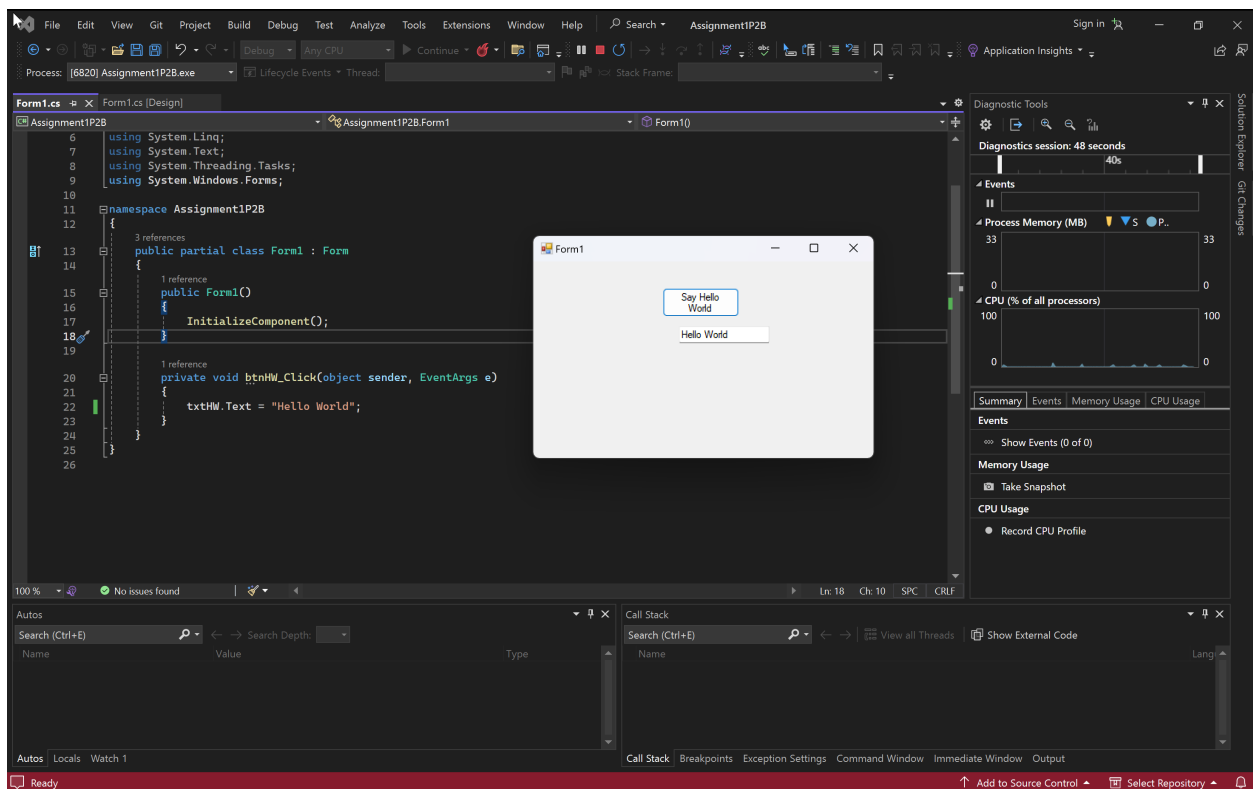

The Winform application shall have two components, a Button and Label. The button should be labeled “Say Hello”, the label can have whatever initial text you want. When the user clicks on the button the label shall change to “Hello World.”.

## Submission:

Part a

## Part b

## **Part 3.**

Complete all of Worksheet 1, with the exception of the last scenario, "Dial a Sentence".
